

**XXXIX.—Descriptions of Chalcidites discovered in Valdivia  
by C. Darwin, Esq. By FRANCIS WALKER, F.L.S.**

**Pachylarthus Sariaster, Mas.** *Viridis, antennæ luteæ, pedes flavi, alæ limpidae.*—**Fem.** *Cupreus, antennæ nigræ, pedes fulvi, femora viridia.*

**Mas.** Corpus crassum, convexum, nitens, viride cupreo-varium, scite squameum, parce pubescens: caput magnum, transversum, breve, viride, thorace latius; vertex latus, cupreo-varius; frons impressa, abrupte declivis: oculi rufi, mediocres, non extantes: os flavum; palpi maxillares clavati; antennæ luteæ, graciles, subfiliformes, 13-articulatæ, thorace paullo longiores; articulus 1<sup>us</sup> longus, gracilis; 2<sup>us</sup> longicyathiformis; 3<sup>us</sup> et 4<sup>us</sup> minimi; 5<sup>us</sup> et sequentes usque ad 10<sup>um</sup> mediocres, subæquales; clava longiconica, acuminata, articulo 10° fere duplo longior: thorax ovatus, robustus: prothorax transversus, brevis, antice angustus: mesothoracis scutum longitudine latius; parapsidum suturæ bene determinatæ, postice approximate; paraptera et epimera magna; scutellum subconicum, sat magnum: metathorax mediocris, obconicus, declivis: petiolus sat longus: abdomen rhombiforme, contractum, lœve, glabrum, latitudine non longius, thoracis dimidii longitudine; segmentum 1<sup>um</sup> maximum, dorsum obtegens: pedes flavi, simplices, subæquales; coxae virides; unguis et pulvilli fusi: alæ limpidae; squamulæ luteæ; nervi fulvi; nervus humeralis ulnari multo longior, radialis ulnari vix brevior, cubitali duplo longior; stigma minutum.

**Fem.** *Cupreus, parum nitens: caput thorace vix latius: palpi maxillares simplices: antennæ nigræ, subfiliformes, thorace non longiores; articulus 2<sup>us</sup> cyathiformis; 5<sup>us</sup> et sequentes usque ad 10<sup>um</sup> subæquales, approximati; clava conica, articulo 10° longior: petiolus brevis: abdomen ovatum, supra fere planum, subtus carinatum, apice acuminatum et attenuatum, thorace vix longius; segmentum 1<sup>um</sup> magnum, 2<sup>um</sup> et sequentia brevia: pedes fulvi; coxae virides; femora viridia, apice fulva.* (Corp. long. lin. 1—1½; alar. lin. 1¾—2¼.)

**Dicyetus Lynastes, Fem.** *Viridi-aeneus, antennæ nigræ, pedes fulvi, femora ænea, alæ limpidae.*

Corpus breve, convexum, viridi-aeneum, nitens, scitissime squameum, parce hirtum: caput transversum, breve, thorace paullo latius; vertex latus; frons impressa, abrupte declivis: oculi rufi, mediocres, non extantes: antennæ nigræ, graciles, subclavatae, thorace vix longiores; articulus 1<sup>us</sup> longus; 2<sup>us</sup> cyathiformis; 3<sup>us</sup> et 4<sup>us</sup> minimi; 5<sup>us</sup> et sequentes usque ad 10<sup>um</sup> subæquales, approximati; clava conica, compressa, acuminata, articulo 10° multo longior: thorax ovatus: prothorax transversus, brevis, antice angustus: mesothoracis scutum longitudine latius, parapsidum suturæ remotæ, sat bene determinatæ, postice approximate; paraptera et epimera magna; scutellum subconicum, mediocre: metathorax brevi-obconicus, declivis: petiolus brevis: abdomen subrotundum, supra fere planum, subtus carinatum, apice acuminatum, thorace brevius; segmentum 1<sup>um</sup> magnum: pedes fulvi, simplices, subæquales; coxae æneæ; femora ænea, apice fulva; tarsi apice fusi: alæ limpidae; squamulæ piceæ; nervi fulvi; nervus humeralis ulnari multo longior, radialis ulnari vix brevior, cubitali longior; stigma minutum. (Corp. long. lin. ¾; alar. lin. 1½.)

**Lamprotatus Natta, Mas.** *Viridi-cyaneus, antennæ nigræ, pedes flavi, alæ limpidae.*

Corpus angustum, sublineare, convexum, viridi-cyanum, nitens, scitissime squameum, parce hirtum: caput transversum, breve, viride, thorace latius; vertex latus, æneo-varius; frons impressa, abrupte declivis: oculi rufi,

mediocres, non extantes : antennæ nigrae, graciles, subfiliformes, thorace vix breviore; articulus 1<sup>us</sup> longus, sublinearis; 2<sup>us</sup> longicyathiformis, 3<sup>us</sup> et 4<sup>us</sup> minimi; 5<sup>us</sup> et sequentes usque ad 10<sup>us</sup> subæquales, approximati; clava longiovata, acuminata, articulo 10<sup>o</sup> multo longior: thorax longi-subovatus: prothorax transversus, mediocris, antice paullo angustior: mesothoracis scutum longitudine latius; parapsidum suturæ bene determinatæ, postice approximatæ; paraptera et epimera magna; scutellum subconicum, mediocre: metathorax magnus, declivis, obconicus: petiolus sat longus: abdomen brevi-ovatum, lœve, glabrum, thorace multo brevius: pedes flavi, simplices, subæquales; coxae virides; tarsi apice fusi: alæ limpidæ; squamulæ piceæ; nervi fulvi. (Corp. long. lin. 1; alar. lin. 1 $\frac{1}{2}$ .)

*Lamprotatus Bisaltes*, Mas. *Aeneo-viridis, antennæ nigrae, pedes flavi, femora viridia, alæ limpidæ.*

Corpus convexum, æneo-viride, nitens, scitissime squameum, parce hirtum: caput transversum, breve, thoracis latitudine; vertex latus; frons impressa, abrupte declivis: oculi rufi, mediocres, non extantes: antennæ nigrae?: thorax ovatus: prothorax transversus, brevissimus: mesothoracis scutum longitudine latius; parapsidum suturæ bene determinatæ, postice approximatæ; paraptera et epimera magna; scutellum conicum, mediocre: metathorax brevi-obconicus, declivis: petiolus brevissimus: abdomen sublineare, lœve, glabrum, fere planum, thorace angustius et multo brevius; segmentum 1<sup>us</sup> maximum: pedes flavi, simplices, subæquales; coxae virides; femora viridia, apice flava; tarsi apice fusi: alæ limpidæ; squamulæ piceæ; nervi fusi; nervus humeralis ulnari fere duplo longior, radialis ulnari paullo brevior, cubitali paullo longior; stigma parvum. (Corp. long. lin. 1; alar. lin. 1 $\frac{1}{4}$ .)

*Lamprotatus Orobia*, Fem. *Viridis, cupreo-varius, antennæ nigrae, pedes rufi, femora basi viridia, alæ limpidæ.*

Viridis, convexus, nitens, scitissime squameus, parce pubescens: caput transversum, mediocre, thoracis latitudine; vertex sat latus; frons abrupte declivis, ad antemarum receptionem excavata: oculi picei, mediocres, non extantes: antennæ subfiliformes, nigrae, graciles, pubescentes, thorace non longiores; articulus 1<sup>us</sup> longus, gracilis; 2<sup>us</sup> longicyathiformis; 3<sup>us</sup> et 4<sup>us</sup> vix conspicui; 5<sup>us</sup> longicyathiformis; 6<sup>us</sup> et sequentes breviore: thorax longiovatus: prothorax mediocris, transversus, antice angulum utrinque singens non angustior: mesothoracis scutum longitudine vix latius; parapsidum suturæ bene determinatæ, postice approximatæ; paraptera et epimera magna; scutellum mediocre, conicum: metathorax mediocris, declivis, obconicus: petiolus brevis: abdomen ovatum, nitens, lœve, fere glabrum, apice acuminatum, thorace paullo brevius: segmenta antica magna, postica breviora: oviductus non exertus: pedes graciles, recti, subæquales, pallide rufi, pubescentes: coxae virides; trochanteres piceæ; femora basi viridia; tarsi apice fusi: alæ limpidæ, mediocres; squamulæ viridi-piceæ; nervi fusi; nervus humeralis ulnari fere duplo longior, cubitalis radiali brevior; stigma minutum. (Corp. long. lin. 1 $\frac{1}{4}$ ; alar. lin. 2 $\frac{1}{4}$ .)

*Var. β.—Capitis vertex viridi-æneus: thoracis discus cupreo-æneus: abdomen cupreo-varium.*

*Pteromalus Megareus*, Fem. *Viridi-æneus, antennæ nigrae, pedes flavi, femora viridia, tibiae fusco-cinctæ, alæ limpidæ.*

Corpus viridi-æneum, convexum, parum nitens, scitissime squameum, parce pubescens: caput transversum, breve, thorace paullo latius; vertex sat latus; frons abrupte declivis, excavata: oculi picei, mediocres, non extantes: antennæ nigrae, subclavatae, pubescentes, sat graciles, thorace non longiores;

articulus 1<sup>us</sup> viridis: thorax breviovatus: prothorax brevissimus, supra vix conspicuus: mesothoracis scutum latum; parapsidum suturæ non bene determinatae; scutellum subrotundum, mediocre: metathorax brevis, declivis, obconicus: petiolus brevissimus: abdomen longiovatum, nitens, læve, fere glabrum, supra planum, subtus carinatum, apice acuminatum, thorace longius et angustius: pedes flavi; coxae virides; femora viridia, apice flava; tibiæ fusco-cinctæ; tarsi apice fusi: alæ limpidæ; squamulæ piceæ; nervi fulvi; nervus humeralis ulnari multo longior, cubitalis radiali multo brevior; stigma minimum. (Corp. long. lin. 1; alar. lin. 1½.)

*Closterocerus Xenodice*, Mas et Fem. *Viridis cyaneo-varius, abdomen cupreum, antennæ nigræ, pedes flavi, femora viridia, tibiæ fusco-cinctæ, alæ fusco-maculatae.*

*Mas.* Corpus sublineare, angustum; depresso, læte viride, nitens, læve, parce hirtum: caput transversum, brevissimum, inter oculos impressum; vertex sat latus; frons abrupte declivis: oculi mediocres: antennæ subsetaceæ, nigræ, hirtæ, thorace non longiores: thorax ovatus: prothorax brevissimus: mesothoracis scutum longitudine vix latius; parapsidum suturæ vix conspicuæ; scutellum subovatum: metathorax obconicus, declivis, medioris: petiolus brevissimus: abdomen sublineare, cupreum, basi cyaneo-viride, thorace angustius non longius: pedes flavi; coxae virides; femora viridia; tibiæ fusco-cinctæ; tarsi apice fusi: alæ mediocres, ciliatæ, fulvotinctæ, in discum obsolete fusco-maculatae; squamulæ piceæ; nervi fulvi; nervus ulnaris humerali multo longior, cubitalis vix ullus, radialis brevissimus in alæ discum abrupte declivis; stigma minimum.

*Var. β.*—Tibiæ omnino fuscæ: alis maculæ vix conspicuæ.

*Var. γ.*—Alæ omnino limpidæ.

*Fem.* Cyaneo-viridis: antennæ setaceæ, thorace breviores: abdomen ovatum, thorace paullo brevius vix angustius. (Corp. long. lin. ½—¾; alar. lin. ½—1.)

*Var. β.*—Tibiæ nigro-fuscæ, apice flavæ.

*Platygaster Paches*, Mas et Fem. *Atra, antennæ nigræ, pedes nigri, tarsi picei, alæ subfuscæ.*

*Mas.* Corpus convexum, atrum, nitens, læve, fere glabrum: caput transversum, breve, thorace vix latius; vertex sat latus; frons abrupte declivis: oculi picei, parvi, non extantes: antennæ nigræ: thorax ovatus: prothorax brevissimus, supra vix conspicuus: mesothoracis scutum longitudine latius; parapsidum suturæ non bene determinatae; scutellum subrotundum, non productum: metathorax parvus, obconicus, declivis: petiolus brevis: abdomen longiovatum, thorace paullo angustius non longius; segmentum 1<sup>us</sup> magnum, 2<sup>us</sup> et sequentia breviora: pedes nigri, subæquales; femora clavata; genua picea; tibiae clavatae; tarsi picei: alæ subfuscæ; squamulæ piceæ. (Corp. long. lin. ½; alar. lin. ¾.)

*Fem.* Caput thoracis latitudine: antennæ subclavatae: abdomen longiovatum, apice acuminatum, thorace angustius et paullo longius.

*Inostemma Quinda*, Fem. *Atra, antennæ flavæ, apice fuscæ, pedes flavi, alæ limpidæ.*

Corpus atrum, angustum, sublineare, convexum, læve, nitens, pubescens: caput transversum, subrotundum, thorace vix latius; vertex latus; frons abrupte declivis: oculi parvi, non extantes: antennæ subclavatae, flavæ, apice fuscæ: thorax ovatus: prothorax brevissimus, supra vix conspicuus: mesothoracis scutum transversum, sulcis 2 indistinctis postice approximatis; parapsidum suturæ non bene determinatae; scutellum obconicum, non productum: metathorax brevi-obconicus, declivis: petiolus crassus, brevissimus: abdomen longiovatum, glabrum, apice acuminatum, thorace paullo longius

non angustius; segmentum 1<sup>um</sup> maximum: pedes flavi, simplices, subæquales: alæ limpidae, mediocres; squamulæ piceæ; nervi fulvi; nervus subcostalis alæ basi emissus nervulum in discum rejiciens et spatio brevi ante costæ medium in stigma subfurcatum decedens: nervus quoque spurius alæ basi emissus in discum excurrens et nervo subcostali nervuloque triangulum fingens. (Corp. long. lin.  $\frac{1}{2}$ ; alar. lin. 1.)

*Romilius* (n. g. \*) *Zotale*, Fem. *Ater, antennæ nigrae basi fulvae, pedes fulvi, alæ limpidae.*

Corpus longum, angustum, sublineare, atrum, vix convexum, obscurum, pilis canis pubescens, subtilissime et confertissime punctatum: caput transversum, breve, subrotundum, thorace vix latius; vertex latus; frons convexa, non impressa: oculi parvi, non extantes: antennæ nigrae, graciles, subelavatae, prope os insertæ, thorace non breviores; articulus 1<sup>us</sup> longus, subfusiformis, fulvus; 2<sup>us</sup> longicyathiformis; 3<sup>us</sup> et 4<sup>us</sup> longi, lineares; 5<sup>us</sup> et sequentes ad 10<sup>um</sup> breves, approximati, clavam fingentes longifusiformem: thorax longiovatus: prothorax brevissimus, postice excavatus: mesothoracis scutum magnum, trisulcatum, longitudine vix latius; sulci laterales postice approximati; scutellum parvum, semicirculum fingens: metathorax mediocris, obconicus: petiolus brevissimus: abdomen longifusiforme, subtus convexum, apice acuminatum, thorace multo longius; segmentum 1<sup>um</sup> breve; 2<sup>um</sup> et 3<sup>um</sup> magna; 4<sup>um</sup> et 5<sup>um</sup> paullo breviora; 6<sup>um</sup> adhuc brevius: pedes fulvi, longi, graciles, simplices, subæquales; tarsis articulus 1<sup>us</sup> longus, 2<sup>us</sup> multo brevior, 3<sup>us</sup> adhuc brevior, 4<sup>us</sup> 3° brevior, 5<sup>us</sup> 4° paullo longior: alæ mediocres, limpidae, abdominis apicem dum quietem agunt non attingentes; squamulæ fulvae; nervi fulvi; nervus subcostalis alæ basi emissus ad costæ medium eam attingens et fere ad alæ apicem percurrents; nervus 2<sup>us</sup> quoque alæ basi emissus in discum excurrens ibique furcatus, furca antica nervo subcostali triangulum fingens, furca postica ad alæ marginem posticum decedens; nervus cubitalis rectus, sat longus, nervo subcostali ubi costam attingit emissus, stigmate terminatus minuto. (Corp. long. lin. 1 $\frac{1}{4}$ ; alar. lin. 2 $\frac{1}{4}$ .)

[To be continued.]

## XL.—*The Crustacea of Ireland. Order Decapoda.* By Wm. THOMPSON, Esq., Vice-Pres. Nat. Hist. Society of Belfast.

### CRUSTACEA. Order DECAPODA.

#### DECAPODA BRACHYURI.

*Macropodia phalangium*, Leach, Mal. pl. 23. f. 6; Desmar. p. 155. pl. 23. f. 3.

*Stenorhyncus phalangium*, Edw. Crust. tome i. p. 279.

*Cancer phalangium*, Penn. Brit. Zool. vol. iv. p. 11. pl. 9. f. 3, edition 1812.

This species has already been recorded by Templeton as "not uncommon on the Irish coast," and by Mr. J. V. Thompson as "very abundant in the deep water of the harbour of Cove." Ent. Mag. vol. iii. p. 371.

It has occurred very commonly to my scientific friends and myself when dredging in the loughs of Strangford and Belfast; and to Mr.

\* *Scelio Duris* (Monogr. Chalcid., ii. 61.) also belongs to this genus.
